**Corpus Christi Sunday B - 2nd June 2024****

**THE MONTH OF JUNE  
IS DEDICATED TO THE  
SACRED HEART OF JESUS**

is that I am subjected to these insults by persons especially consecrated to My service.”

To those who show Him love and make

Devotion to the Sacred Heart of Jesus is of great antiquity in the Church. It was **St Margaret Mary Alacoque**, however, who made this devotion widespread. In 1675, within the octave of **THE FEAST OF CORPUS CHRISTI**, Our Lord appeared to her and said: “Behold this heart which, notwithstanding the burning love for men with which it is consumed and exhausted, meets with no other return from most Christians than sacrilege, contempt, indifference and ingratitude, even in the Sacrament of My Love [The Most Holy Eucharist]. But what pierces My Heart most deeply

reparation for sins, however, Our Lord made a great pledge: “**I promise you in the unfathomable mercy of My Heart that My Omnipotent Love will procure the grace of final penitence for all those who receive Communion on nine successive First Fridays of the month; they will not die in My disfavour, or without having received the Sacraments, since My Divine Heart will be their refuge in the last moments of their life.**”

**FROM: Eucharistic Miracle of Lanciano (therealpresence.org) EUCCHARISTIC MIRACLE: LANCIANO, ITALY 8TH CENTURY A.D.**

Ancient Anxanum, the city of the Frentanese, has contained for over twelve centuries **THE FIRST AND GREATEST EUCCHARISTIC MIRACLE** of the Catholic Church. **This wondrous Event** took place in the 8th century A.D. in the little Church of St. Legontian, as a divine response to a **Basilian monk's doubt about Jesus' Real Presence in the Eucharist.**

During Holy Mass, after the two-fold consecration, the Host was changed into live Flesh and the wine was changed into live Blood, which coagulated into five globules, irregular and differing in shape and size.

The Host-Flesh, as can be very distinctly observed today, has the same dimensions as the large host used today in the Latin church; it is light brown and appears rose-coloured when lighted from the back.

The Blood is coagulated and has an earthy colour resembling the yellow of ochre.

Various ecclesiastical investigation ("Recognitions") were conducted since 1574.

In 1970-'71 and taken up again partly in 1981 there took place a scientific investigation by the most illustrious scientist Prof. Odoardo Linoli, eminent Professor in Anatomy and Pathological Histology and in Chemistry and Clinical Microscopy. He was assisted by Prof. Ruggero Bertelli of the University of Siena.

The analyses were conducted with absolute and unquestionable scientific precision and they were documented with a series of microscopic photographs.

These analyses sustained the following conclusions:

- The Flesh is real Flesh. The Blood is real Blood.
- The Flesh and the Blood belong to the human species.
- The Flesh consists of the muscular tissue of the heart.
- In the Flesh we see present in section: the myocardium, the endocardium, the vagus nerve and also the left ventricle of the heart for the large thickness of the myocardium.
- **The Flesh is a "HEART"** complete in its essential structure.
- The Flesh and the Blood have the same blood-type: AB (Blood-type identical to that which Prof. Baima Bollone uncovered in the Holy Shroud of Turin).
- In the Blood there were found proteins in the same normal proportions (percentage-wise) as are found in the sero-proteic make-up of the fresh normal blood.
- In the Blood there were also found these minerals: chlorides, phosphorus, magnesium, potassium, sodium and calcium.

The preservation of the Flesh and of the Blood, which were left in their natural state for twelve centuries and exposed to the action of atmospheric and biological agents, remains an extraordinary phenomenon.
